## EDITORIAL

## BUILDING THE NEW NORTH-WEST REGION ONE STEP AT A TIME

*Prof. Fru Fobushzi Angwafo III  
President, North-West Regional Assembly*

These are hard times. It is said: when the going is tough, the tough get going! In this dog eat dog world, the more things change, the more they stay the same! And what has that got to do with a compendium or catalogue of accomplishments of your maiden Regional Assembly? Good question. In this 4<sup>th</sup> edition of the North-Westerner a brief presentation of projects and call for a return to our commitment to the community is our priority. Our strength, indeed our survival, depends on the growth and self reliance of community net-

works. The African adage that alone one fizzles out but together we are stronger and can go further calls for a mobilization of all in our villages, Sub-Divisions and divisions. This justifies the Peace and Development Initiative (PDI). When communities take ownership of their lives, they can count on their multifaceted reserves rather than uncertain charity from elsewhere in a world in short supply of love, empathy and compassion.

What has been done by the Regional Assembly in that regard? The insistence on studies and maturation of projects as an indispensable factor not only for funding but also for production and quality of projects is a compelling imperative. A mid-mandate review of performance, it seems, is a worthwhile account of the road covered across the Region. A brief presentation of studies carried out to better structure projects executed all over the region will be catalogued. Some of the most endearing and impactful projects are not necessarily tangible. The feasts, socio-cultural activities, sports and musical events also contribute to growing social harmony and peace, an intangible imperative. An account of our efforts to partner with those who share our values and vision will be presented. We hope this account will spur our readers to join the People's Assembly ever ready to listen in its quest to improve livelihoods of all in the spirit of "U na Mi, Mi na U, Wi bi Wi". In these tough times, let us harness our natural resources (local materials and talents) to innovate, invent a tomorrow of envy.

## PERSPECTIVE

### NWRA: ANCHORING ON FEASIBILITY STUDIES FOR EFFECTIVE PROJECT REALIZATIONS

*By Alombah Anderson Akondi*

The growth and recognition of project maturation, execution and management has significantly changed over the years and these changes continue to increasingly expand. As far as the missions and objectives of the North-West Regional Assembly are concerned, with the crucial need for effective project realization, comes the indispensable role of thorough fea-

sibility studies before project implementation. Many people ignorantly ask why the North-West Regional Assembly spends huge costs on carrying out feasibility studies. This article is aimed at clarifying this misconception. Given that the North-West Regional Assembly is out to create real change and impact in our communities, it can be quite thrilling to start a complex large-scale project for significant benefit to the population, but of what use is such a project without carrying out a thorough analysis to determine the viability and feasibility of such an initiative to the benefit of our people? Carrying out prior thorough feasibility studies and community need assessments before project implementation is as good as the project itself.

What is actually a feasibility study? Before every worthwhile project realization, the Regional Assembly carries out a feasibility study or comprehensive analysis that assesses or evaluates the proposed project's practicality and viability to determine how feasible the project is. The Regional Assembly through these feasibility studies conducts the rational analysis of every proposed or potential project to determine its weaknesses, strengths, potential opportunities and

Feasibility Studies for the construction of Bamenda Emergency Centre

threats, resources or cost required to realize the project and the expected value or ultimate success prospects of the project envisaged. The key elements of feasibility studies include an architectural report, topographical report, geotechnical report, financial report (bill of quantities and cost estimate), structural calculation report and a business plan where necessary.

What is actually the main objective or primary purpose of a feasibility study?

The Regional Assembly fully understands that it takes a good and well-conceived feasibility study or analysis to determine the viability of every proposed project. These studies aim to provide an independent assessment that fully examines all aspects of every proposed project, including technical, economic, financial, legal and environmental considerations and more that ensure healthy decision-making to determine if the given project is feasible, justifiable and worth investing in for the benefit

of the population and communities.

Without these prior analyses, it is impossible to determine whether or not a proposed project is worth pursuing; and most often, the study results can also be used to create a realistic project plan and cost, if the project is validated to be implemented.

How many feasibility studies has the Regional Assembly conducted so far as at its mid-term mandate (30 months of existence)?

In practical terms, the Regional Assembly carried out a total of eleven (11) feasibility studies in 2021 and 2022 budgetary years and these studies formed the basis for all on-going and executed projects of the North-West Regional Assembly. Through quality feasibility studies, the North-West Regional Assembly has been able to secure funding from FEICOM to the tune of seven billion, five hundred million (7,500,000,000) CFA.

## THE REGION UNDER CONSTRUCTION

Follow up and Control visit for the Rehabilitation of Sarki Palace, Old Town on July 07, 2023

Control visit to the Construction site of the Multipurpose Laboratory in GBHS Bamendankwe on July 07, 2023

## NWRA: MAKING SIGNIFICANT STRIDES IN RE-CONSTRUCTING THE REGION

*By Victory Marshal Ayafor Basang*

It is crucial to first and foremost understand the program areas of the North-West Regional Assembly, because they constitute the basis on which every project activity or action is realized. As a matter of fact, competences have been devolved by six ministerial departments through which their activities run on four programs which are: Program 1: Improving the Provision of Basic Social Services, Program 2: Promotion of Economic Development and Environmental Protection of the Region, Program 3: Promotion of Citizenship, Culture, Sports and Youth Support and Program 4: Governance and Local Administration.

As at Mid-Term mandate, the North-West Regional Assembly has programmed a total of sixty six projects with 11 being feasibility studies, 16 new constructions, 24 rehabilitations, three Controls, five Supply projects and seven for other works; giving a total of sixty six projects as mentioned above.

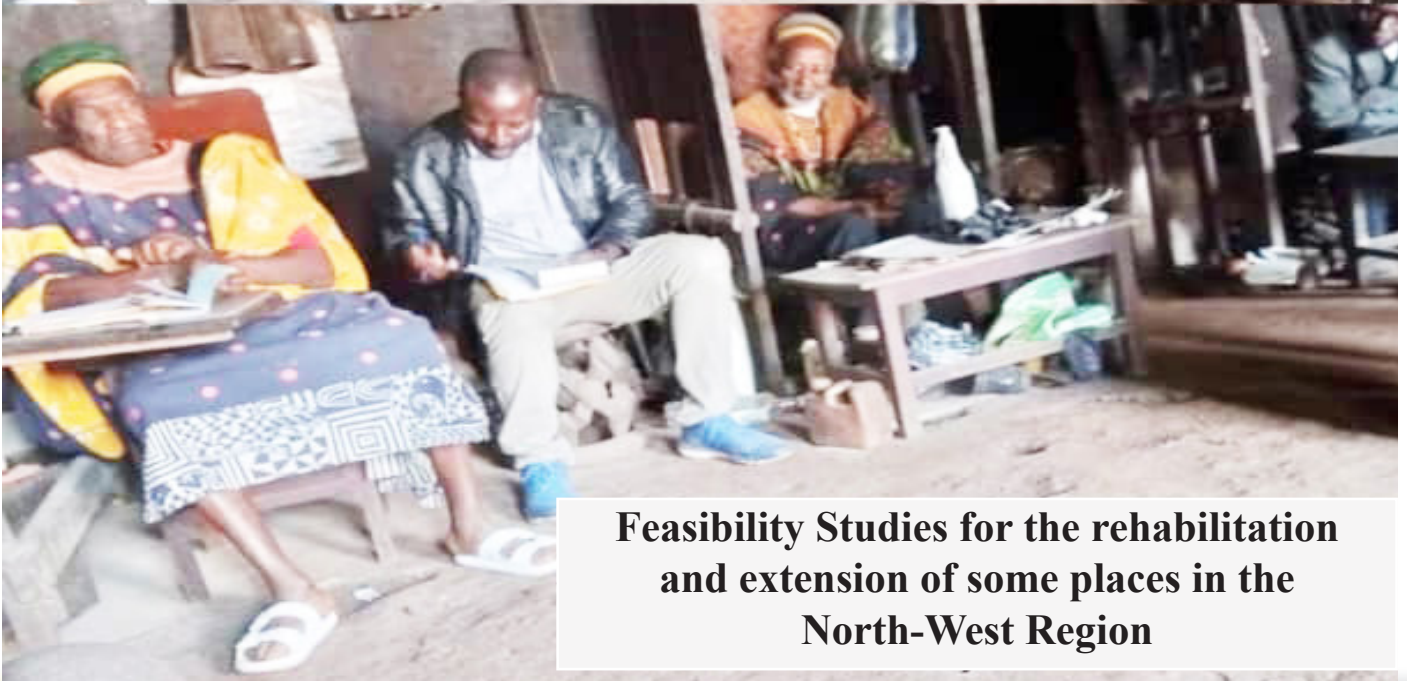

To track the progress of number of projects per year, we have;

YEAR	NO OF PROJECTS EXECUTED
2021	07
2022	22
2023	37
<b>TOTAL NO OF PROJECTS</b>	<b>66</b>

**FEASIBILITY STUDIES**

<b>BUDGETARY YEAR</b>	<b>DESIGNATION</b>	<b>CONTRACTOR</b>	<b>OBSERVATION</b>
<b>2021</b>	Feasibility studies for the Rehabilitation and Extension of some Palaces in the North-West Region	INTERGRATED ENGINEERING ASSOCIATE (IEA)	Region-wide

**Project:** 00000008/ONIT/NWRA/ITB/2022 OF 08/08/2022 FOR REHABILITATION OF DESTROYED CLASSROOMS

IN VARIOUS SECONDASRY AND HIGH SCHOOLS AND DISTRICT HOSPITALS IN ALLSEVEN DIVISIONS OF THE NORTH WEST REGION BY EMERGENCY PROCEDURE (LOT3: REHABILITATION OF AKO DISTRICT HOSPITAL IN DONGA /MAMNTUNG DIVISION)

**Subject:** SITUATION OF THE EXECUTION OF THE PROJECT

Following the recommendations of the acceptance committee; the contractor, the Jobbing order Engineer and I, the Beneficiary, we did sit down and agreed that, the lines on the bill of quantities which were not executed, should be removed, and the funds used to rehabilitate the roof. The foreman came to the hospital on the 8<sup>th</sup> of February 2023 and did some assessments and left without us arriving a consensus on the Items to be removed from the bill of quantities. It was on the 21<sup>st</sup> of February 2023 that we concluded on the readjustment of the bill of quantities, in the presence of the Honorable councillors for Ako and the Director of general affairs at the Regional council. The Jobbing order engineer promised to deposit the new draft project the next day, 22nd February 2023 in the morning, and the contractor promised to resume work immediately. As I write the work on the roof of the male and female work is being rounded off (95% completed since the funds could not permit work on the entire hospital roof). I will like to end by expressing gratitude of the staff and patients for this work done by the Regional council.

## PDI UPDATES

### NWRA: LEADING IN YOUTH EMPOWERMENT AND INCLUSIVE COMMUNITY DEVELOPMENT

*By Gnoukapisir Martial P.*

The Peace and Development Committees for the 07 Divisions of the Region have taken turns to officially launch the implementation phase of their High Intensity Labour Approach (HILA) projects for their respective Sub Divisions.

During these launches, some youths who have been selected from the Divisions as beneficiaries to work in the execution of the North -West Regional Assembly's Peace and Development Initiative (PDI), have received work tools for the realization of the said project. The durable equipment provided for these youths include wheelbarrows, spades, dig axes, rain boots, cutlasses, engineering caps, jackets, etc. The PDI community decentralised activities, though specific to every Division and Sub-Division based on need assessment, consist of; opening of waterways, construction/cleaning of gutters and cuverts, clearing of streets and markets, disposing of gabbage, filling of pot holes, cleaning/opening of roads, etc.

Expressing gratitude to the Regional Assembly for such a life-sustaining initiative, one of the youth beneficiaries in Nwa Sub Division of Donga Mantung, Mr Aloys, said, "I am very grateful for such an initiative by the Regional Assembly; it has helped me and many other youths in our community to gain employment in our own communities. We thank the Regional Assembly for thinking of providing local solutions to local problems using our own youths and resources. This initiative will fetch us resources to pay fees for our children and set up petty businesses for improvement of our livelihoods. So we really thank the Regional Assembly for its PDI vision."

This implementation phase of the Regional

Assembly's PDI mission was preceded by capacity training seminars to drill the stakeholders and beneficiaries on the modalities of the project in all the 07 Divisions of the Region. It should be noted that the Peace and Development Initiative of the North-West Regional Assembly has as vision to build peace and drive socio-economic development through community driven decentralized activities, a way to rebranding a new North-West Region. Moreso, to promote solidarity, social cohesion, citizen-participation and improved livelihoods, which are the pillarstones for the construction of the new North-West Region where in everyone counts and is counted and we grow together as one united fabric as our proverbial slogan clearly states; "U na Mi, Mi na U, Wi bi Wi". PDI is also about building peace and sustainable development through strengthened community systems and decentralized activities. while using the communities to identify, develop and execute their own projects using the High Intensive Labour Approach.

This initiative has as core objective to alleviate poverty at the grassroots levels, promote local economy and circulation of liquidity in the communities and promote citizen-participation and social cohesion. The second phase of this PDI project in the 07 Divisions of the Region seeks to engage the population in HILA activities for indigenous benefits.

Follow the North-Westerner Magazine team around the Divisions through the following pictures for PDI updates.

## FUNCTIONS OF UNDP

The UNDP is a key technical partner of the North West Regional Assembly to drive development and socio-economic growth in the Region, especially in the Health, Education and Energy sectors.

"We have a commitment to the Government of Cameroon, the North West Region and its people; hence, we will anchor on the projections of the Presidential Plan for Reconstruction of NW/SW (PPRD-NW) and North West Regional Development Plan to achieve our objectives. So keep counting on us."

The Resident Representative of UNDP  
in Cameroon  
Mr Aliou Mamadou Dia
